Highly motivated Mobile Application Developer with 2 years of experience building user-centric mobile apps using Swift, Dart (Flutter), Java, and Kotlin. Proven ability to deliver high-quality, deadline-meeting code that exceeds user expectations. Successfully developed a mobile app feature for Virtual Qube Technologies that resulted in more than 10K downloads. Proficient in these languages and possess a strong understanding of mobile development frameworks and best practices. Committed to continuous learning and staying current with the latest trends and technologies. Eager to leverage my skills and passion for mobile development to contribute to the success of your growing team.

## Experience

### iOS and Flutter Developer Virtual Qube Technologies

November 2020 - July 2022

- Solely responsible for iOS and Flutter development, demonstrating adaptability and versatility to address diverse mobile development needs efficiently.
- Seamlessly incorporated Flutter development into the skill set in response to market demands, enhancing the company's product offerings and staying ahead of industry trends.
- Proactively pursued self-directed learning through platforms like Udemy, acquiring proficiency in Flutter while concurrently managing iOS projects.
- Contributed to the company's competitive edge by staying abreast of evolving technologies, driving innovation, and delivering high-quality solutions aligned with market trends.
- Positioned the company for sustained growth and success through continuous improvement and dedication to mastering emerging technologies in mobile development.

## Projects

### Let's Relate Better (Flutter)

10K+ Downloads | 4.3 Rating

- Enhanced User Experience: Spearheaded a comprehensive UI redesign that elevating aesthetics and usability to improve user engagement and satisfaction.
- Expanded Functionality: Successfully integrated new dating features into the app, broadening its appeal and attracting a wider user base, thereby increasing market competitiveness and potential revenue streams.
- Collaborative Success: Leveraged mentorship and collaboration to seamlessly implement logical elements within the project, resulting in enhanced app functionality and user experience, ultimately driving sustained user retention and market reach.

### Chitchat - Personal Project (Flutter)

- Developed a Flutter-based chatting application akin to WhatsApp, featuring real-time messaging and story sharing functionalities.
- Implemented customizable features such as chat background color selection, and story management including adding, deleting, and viewing stories.
- Planned future updates include adding privacy features like hiding/unhiding chats and integrating social media accounts like Facebook, Instagram, and LinkedIn for seamless connectivity.
- Leveraged Firebase for real-time database and authentication, ensuring a robust and secure user experience.

### Quick Note - College Project (Kotlin Multi-platform)

- Developed a notes application called Quick Note using Kotlin Multi-platform for the 1st-semester final project at Cambrian College, showcasing proficiency in Kotlin and cross-platform development.
- Implemented core features including adding, deleting, and viewing notes, along with a unique UI design featuring random color selection for the home page.
- Successfully completed the project, highlighting skills in project management, problem-solving, and application of software engineering principles.

## Education

### Mobile Application Development

Expected to April 2024

#### Cambrian College - Toronto (GPA: 3.69)

- Studied multi-platform app development using Kotlin, UI/UX design with Figma, and cloud-based application storage with Firebase, complemented by a strong understanding of C# and .NET programming.

### Graduate Certificate in Information Technology

June 2023

#### Algoma University - Brampton (GPA: 3.60)

- This program equips me with a deep understanding of computer science fundamentals, data structures, and database programming, coupled with practical expertise in mobile technology, software engineering, and systems analysis, empowering me to design and implement cutting-edge IT solutions in line with contemporary business strategies.

### Bachelor's in Information Technology

June 2019

#### Gujarat Technological University - (GPA: 2.88)

- Provides proficiency in core IT concepts and practical skills, enables me to effectively solve real-world problems, collaborate in multidisciplinary teams, and stay up-to-date of emerging technologies and industry trends.

## Awards and Certification

- President's Honour Award in Cambrian College for 4.0 GPA (Sem-1)
- Star Performer of the year for User Interface Design at Cambrian College

## Skills

- **Technical:** Flutter, Dart, Swift, iOS, Firebase, Java, Kotlin, C, C++, Widget, storyboard, Third party libraries implementation, Version Control, GitHub, SQLite, RESTful APIs, Core data, App Life Cycle, iOS SDK, Flutter SDK, State management, Platform-specific Code, Deployment
- **IDE:** Extensive knowledge of Android Studio, XCode
- **UI/UX Design:** Figma, Adobe XD
